

Summer is the perfect time to slow down, take deep breaths, and enjoy the moments of pure relaxation.

Summer vacation is the time when you can be more creative and candid. It is complete fun as we get more time to spend with parents, grandparents, friends and relatives.

Homework, with a lot of creativity will help the child to remain engaged in a plethora of activities. **“The best inheritance a parent can give his children is a few minutes of his time each day.”**

Lets turn this summer break into an empirical experience. You can make the most of the time together by minimising disruptions and distractions. This can be as easy as putting away your phone or work. It helps your child know that you’re keen to spend uninterrupted time with them. Planning some regular one-on-one time with your child can help you make the time count. The small gestures and activities mentioned below will definitely help to recreate a new environment for the child:

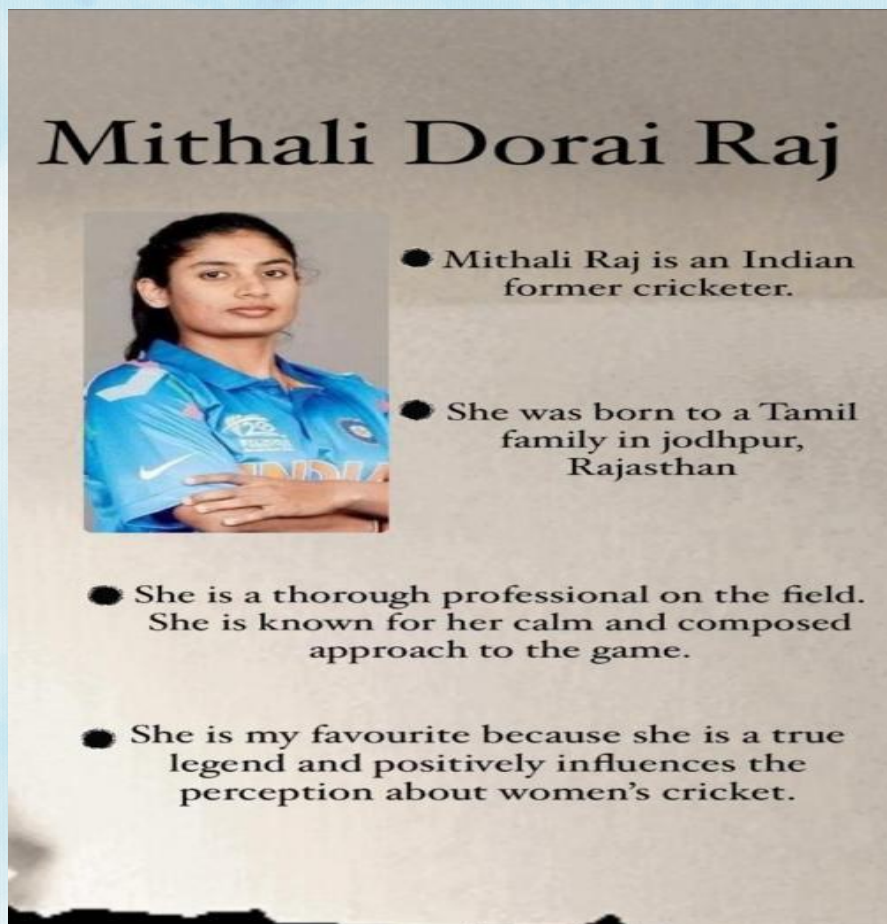

- Eat meals with your children at least twice a day. Tell them about the importance of farmers and their hard work. And tell them not to waste their food.
- Let them wash their own plates after eating. Through such activities, children will understand the value of hard work.
- Let them help you with your daily chores like letting them chop vegetables, clean the table after meal etc.
- Let them spend more time with their grandparents. They learn many good things and you will notice a positive change in their daily routine and behaviour too! Click as many pictures to cherish these moments later in life.
- Take them to your work place so that they can understand how hard you work for the family.
- Motivate your children to sow seeds to create a kitchen garden or a small ornamental garden in your balcony. Knowing about trees and plants is also important for the development of your child.
- Tell children about your childhood and your family tree.
- Let your children go out and play, let them get hurt, let them get dirty. It is good for them to fall occasionally and endure pain. They become more resilient. A life of comfort like sofa cushions will make your children lazy.

Above all, enjoy being with your child, make the most of the time together and know that your love and presence go a long way to help your child thrive happily.

All the homework must be done as per the instructions given.
Do it on A4 size sheets and compile it in one folder and label it.
Adventure awaits you this summer. Explore new horizons and create unforgettable memories

Maths

“Mathematics is considered the pinnacle of human creativity”

We are sure that all of you must be enjoying your holidays along with taking all the precautions! Apart from enjoying, we want you to nurture and instill a sense of responsibility from a very early stage.

Given below are the activities which you all have to complete during the ongoing holidays:

Activity 1:

Sudoku puzzles are based around a grid, into which you have to place numbers in the right squares. Most Sudoku's are 9 squares by 9 squares (although other varieties are possible), and are subdivided into nine boxes each of 3 squares by 3 squares.

The idea behind the puzzles is that each of the squares should contain a number from 1 to 9. There are just three restrictions:

Each row of the grid must contain all the numbers from 1 to 9

Each column of the grid must contain all the numbers from 1 to 9

Each 3 by 3 box inside the grid must contain all the numbers from 1 to 9

The combination of these three rules, where each number must appear once and only once per row, column and box, allow you to figure out where the numbers are allowed to go.

- Solve these Sudoku, cut them and paste on A4 sheet.

4		1	2	9			7	5
2			3			8		
	7			8				6
			1		3		6	2
1		5				4		3
7	3		6		8			
6				2			3	
		7			1			4
8	9			6	5	1		7

3		8	1		2
2	1		3	6	4
		2	4		
8	9			1	6
	6				5
7	2			4	9
		5	9		
9	4		8	7	5
6		1	7		3

Activity 2: (On A4 sheet)

Roman Numerals is a special kind of numerical notation that was earlier used by the Romans. The Roman numeral is an additive and subtractive system in which letters are used to denote certain base numbers and arbitrary numbers in the number system. An example of a roman numeral is XLVII which is equivalent to 47 in numeric form. Roman numerals are denoted using a different combination of symbols that include the English alphabet. For example, 5 in Roman numeral is denoted by V. It has wide applications in naming anything such as Class I, Class II, Class X, etc.

Based on this:

- Collect the names of any five favourite players.
- Search the height and weight of these players.
- Write their height and weight in Roman Numerals with sketch pen.

Activity 3: (On A4 sheet)

The Indian Premier League (IPL), is a men's Twenty20 (T20) cricket league held annually in India.
