

Summer is the perfect time to slow down, take deep breaths, and enjoy the moments of pure relaxation.

Summer vacation is the time when you can be more creative and candid. It is complete fun as we get more time to spend with parents, grandparents, friends and relatives.

Homework, with a lot of creativity will help the child to remain engaged in a plethora of activities. **“The best inheritance a parent can give his children is a few minutes of his time each day.”**

Lets turn this summer break into an empirical experience. You can make the most of the time together by minimising disruptions and distractions. This can be as easy as putting away your phone or work. It helps your child know that you’re keen to spend uninterrupted time with them. Planning some regular one-on-one time with your child can help you make the time count. The small gestures and activities mentioned below will definitely help to recreate a new environment for the child:

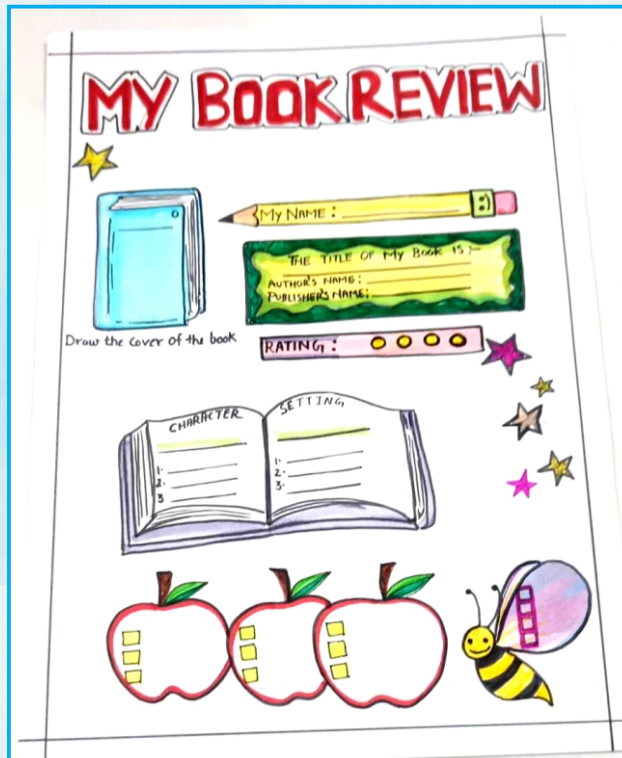

- Eat meals with your children at least twice a day. Tell them about the importance of farmers and their hard work. And tell them not to waste their food.
- Let them wash their own plates after eating. Through such activities, children will understand the value of hard work.
- Let them help you with your daily chores like letting them chop vegetables, clean the table after meal etc.
- Let them spend more time with their grandparents. They learn many good things and you will notice a positive change in their daily routine and behaviour too! Click as many pictures to cherish these moments later in life.
- Take them to your work place so that they can understand how hard you work for the family.
- Motivate your children to sow seeds to create a kitchen garden or a small ornamental garden in your balcony. Knowing about trees and plants is also important for the development of your child.
- Tell children about your childhood and your family tree.
- Let your children go out and play, let them get hurt, let them get dirty. It is good for them to fall occasionally and endure pain. They become more resilient. A life of comfort like sofa cushions will make your children lazy.

Above all, enjoy being with your child, make the most of the time together and know that your love and presence go a long way to help your child thrive happily.

All the homework must be done as per the instructions given.
Do it on A4 size sheets and compile it in one folder and label it.
Adventure awaits you this summer. Explore new horizons and create unforgettable memories

Maths

Just like athletes train their bodies to excel in sports, practicing maths regularly helps strengthen your problem solving skills. This holiday, let's combine the excitement of sports with the thrill of solving maths problems. Complete the following tasks and have fun while improving your mathematical skills.

1. Football Field Geometry

Imagine you're designing a football field for your school. Complete the following tasks:

a) Calculate the perimeter and area of the football field, whose dimensions are 100 meters by 60 meters.

b) If the goalposts are placed at the centre of each end line and each goalpost has a diameter of 1 meter, what is the total area covered by the goalposts?

c) Determine the length of the diagonal of the football field.

2. Running Races

Your school is organizing a running race competition. Solve the following problems:

a) If the distance of the race is 3 kilometers and a runner runs at a constant speed of 12 kilometers per hour, how long will it take to complete the race?

b) Runner X finished a 5-kilometer race in 25 minutes. What was Runner X's average speed in kilometers per hour?

c) If Runner Y's average speed is 8 meters per second, how long will it take to run a 400-meter race?

3. Olympic Records: Following is the medal table of Olympics. Represent this data as bar graph.

Medal table

Rank	Nation	Gold	Silver	Bronze	Total
